

CONSTRUCTION

CEL260-18, CEL260T-18
CEL270-18, CEL270-20

When you need strength and value, the Trailtech Construction series trailers deliver it to you. This series is built to work using a channel iron main frame and mini I-beam crossmembers, and axles that can bear the load. The slipper spring suspension is standard on all Construction series models except on the tilting deck models, which feature the rubber ride axle suspensions. Radial tires with white spoke wheels and chrome centers are standard equipment on all trailers.

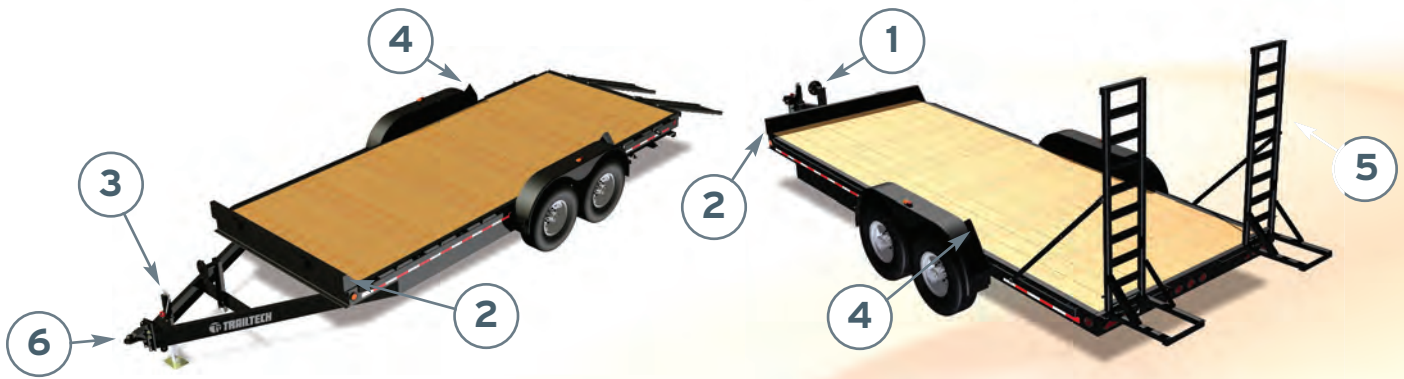

Built for Strength

1) Spare Tire Carrier

All CELR models come with a spare tire carrier. This allows you to have a spare right on the trailer.

2) Front Bump Stop

All CELR models come with a front bump stop.

3) Top Wind Jack

The heavy duty top wind drop leg jack is bolted to the trailer and is easily removeable.

4) Fender Guards

The fender guard protects against the unexpected and will keep your fenders looking good as new for years to come. This is all done without sacrificing payload space.

5) Flip-up Ramps

All CELR models are available with slide in ramps, and when loading heavier equipment the extra support of the flip up ramps will meet your needs.

6) Adjustable Ball Coupler

Hooking up a Construction series trailer is now easier than ever using the adjustable ball coupler to raise or lower the height.
